EXPERIENCE

IBM, Raleigh, NC - Software Engineer - 2017 - 2019

- As part of the Marketplace project I worked closely with designers to help build new components using HTML, CSS and JS to implement template components.
- Collaborated with a team of 8 in an Agile Scrum environment, streamlining workflow and focusing on tasks at hand to meet deadlines.
- As a developer on the product page team I worked on building pages for products using PHP on Drupal CMS platform.
